

Ventim AB

Environmental policy

Ventim's environmental work and policy are available to all employees and external stakeholders. It is our joint responsibility to comply with the policy. The environment concerns us all and therefore cooperation and commitment are required to create a sustainable environment. The environmental policy covers Ventim's own operations and products as well as our relationships with employees and suppliers. Our environmental work is constantly being improved, which must also be reflected in the fact that the environmental policy, environmental goals and environmental requirements are continuously revised and developed. Our ambition is active environmental work where we look at the entire value chain of products and services. Through established routines and dialogues, Ventim ensures that the environmental work run continuously through a well-established management system to ensure the quality of the products. Our attitude is characterized by respect, cooperation and joy in the dialogue with our employees, suppliers and partners.

Our actions

Electricity and energy

Increase the efficiency of energy use. The National Environmental Goals, the Generation Goals and Limited Climate Impact.

Transport / fuel

By 2021, Ventim has streamlined transports through, for example, carpooling to reduce driving distances. Replaced part of the company's meeting trips / year with video, web, telephone meetings. Reports annual CO2 emissions from the internal car fleet to the Group for follow-up and objectives. Continuous work regarding external transports is underway to streamline and reduce the number of transports.

The national goals: Generation goal, Fresh air, Limited climate impact, Protective ozone layer.

Chemicals

Ventim continuously evaluates the use of chemicals at the company to ensure that the use is in line with our goal of substituting hazardous chemicals on the so-called PRIO list.

The National Objectives: Non-toxic environment, good quality groundwater.

We constantly monitor and comply with applicable environmental legislation and other stakeholder requirements. We cooperate and set requirements for our suppliers to ensure that goods, products contain substances on the EU Candidate List, which is a legal requirement for the supplier to inform if a product contains more than 0.1% by weight of a substance.

We also give employees the conditions to take environmental considerations into account in their daily work, including through training and information initiatives.

The National Goals: All Goals
